CORA LONGO

On May 2nd 2023 1-year-old Cora Longo from Collegeville, PA was diagnosed with high risk ALL (Acute Lymphoblastic Leukemia). This diagnosis has now plunged Cora and her family into many years of cancer treatments and family life accommodations. Cora's 10-year-old sister, Mariah, already has her own battles as she was diagnosed with fibular hemimelia and has now endured 8 surgeries to save her leg. Cora's family, facing multiple challenges, needs our community support!
